

ANAS SALAH ELDIN

Software Engineer

Software Engineer specializing in backend systems with experience in building scalable APIs, optimizing databases, and designing efficient system architectures. Skilled in delivering secure, high-performance solutions and solving complex problems. Passionate about clean code, continuous learning, and contributing to impactful, real-world applications.

EXPERIENCE

Data Scientist

Flat and villa

07/2024 12/2024

Cairo, Egypt

Building and serving scalable backend infrastructures by designing robust APIs, enhancing performance, and engineering reliable server-side systems to deliver seamless production environments

Designing and deploying end-to-end AI features leveraging LLMs, RAG pipelines, and agentic systems using cutting-edge AI tools to deliver intelligent, high-performance applications

Technical Sales Engineer

Electra Group

08/2022 12/2022

Alexandria, Egypt

Electra Group Empowering Egypt's Robotics and Electronic Components Market

Providing tailored technical solutions and exceptional customer service to drive growth and innovation in Egypt's robotics and electronic components market.

INTERNSHIPS

Summer Academy Intern

Dell technologies

08/2023 09/2023

Cairo, Egypt

Acquired foundational knowledge in Information Storage and Management, Cloud Computing, and Virtualization,Built a strong foundation for software engineering

Data Science Intern

Technocolabs softwares

07/2022 08/2022

Remote

I collaborated with my team to develop a classification model for a P2P lending organization aimed at boosting their revenue growth, achieving an accuracy of 97%.

PROJECTS

Query Sensei

QuerySensei

Developed an end-to-end Text-to-SQL system that enables non-technical users to query databases using natural language, leveraging state-of-the-art (LLMs)

Engineered a robust backend system for a self-service analytics platform using a fine-tuned LLaMA-3-8B model, enabling natural language-to-SQL conversion and automated data processing workflows. Designed and optimized APIs, query pipelines, and database interactions, improving SQL generation accuracy from 0.3 to 0.7 BLEU score

Walmart Sales Forecasting

Walmart-Sales-Forecasting

Implemented a forecasting system incorporating a robust auto-regression model, aimed to enhance accuracy and reliability. Achieved 0.3 RMSE in production data enhances decision accuracy for both operational and strategic aspects.

EDUCATION

Bachelor of Science in Artificial Intelligence

Kafrelsheikh university

10/2020 7/2024

GENERAL SKILLS

Software Engineering Data Structures
OOP Systems Design Cloud Computing
MachineLearning Deep Learning NLP
Computer Vision Data Engineering
Data Visualization Agile Methodology

SKILLS

Programming Languages

Python SQL Java JavaScript
HTML CSS C++ C

Packages & Frameworks

Django Flask FastAPI Nextjs
DRF Celery BeautifulSoup

Tools

PostgreSQL Mongo DB Docker Azure
Redis Git Linux Postman

CERTIFICATION

Deep Learning Specialization

Coursera

Object-Oriented Design

Alberta university,Coursera
